Signature Control Systems To Acquire Bear Irrigation

Combined Product Platform to Deliver Industry-Defining Technology for the Global Golf, Sports Turf and Commercial Turf Markets

IRVINE, CA (February 8, 2006) - Signature Control Systems Inc. today announced that the company has reached a definitive agreement to acquire Bear Irrigation from Grizzle & Hunter Plastic, LLC.

Under the confidential terms of the agreement, which has been approved by both boards of directors, the transaction is subject to customary closing conditions. The transaction is expected to close in February 2006.

"The combination of Signature and Bear technologies will provide customers an even more powerful set of solutions and water management tools," said Brian J. Smith, Chief Executive Officer of Signature Control Systems. "The primary motivation for the acquisition is to grow our solutions for our current and growing customer base. The acquisition of Bear Irrigation completes an important part of our business strategy: to expand into new markets and increase product development. It also supports our current business strategy of strategic alliances," said Smith.

Together, the two companies will meet a wider set of customer needs and have a significantly greater opportunity to grow into new markets, particularly in the golf, sports turf and commercial turf management segments. "By combining our intelligent controllers, desktop and web-based software – along with the complementary expertise of Mr. Glen Grizzle, President of Grizzle & Hunter Plastic – Signature has the opportunity to bring to our customers an industry-defining technology platform," said Smith.
