**Final Installation**

Attach Keypad & Display IDE & Ground Wires, but do not attach Keypad to pedestal until cable connections have been connected to cards and Chassis.

1. Connect long cable (3) to bottom of Keypad Display. Insert other end through thin opening in Pedestal top. Connect to the top RIGHT connector of the ACPAC [on Chassis]. (See Front View)

2. Insert loose end of the Green Ground Wire (3) end through thin opening of Pedestal top and attach to Chassis screw with nut. (Near ACPAC, see detail).

3. Insert short cable (2) attached to Keypad through thin opening in pedestal top. Connect to the top LEFT connector of the ACPAC [on Chassis].

4. Mount Keypad (1), use four small screws (5). (See below)
