CENTRAL CONTROL

## CENTRAL CONTROL - GOLF

### Online Central Control (web based)

The eSignature<sup>®</sup> Series of Online Central Control or Online Management Systems are internet-based central control system for irrigation control and water management. Communicating with remote irrigation field controllers with wireless connectivity, and allows you management of sites from anywhere in the world via the internet.

Along with all the advantages of internet-based access to remote irrigation field controllers, the eSignature<sup>®</sup> Series of internet based central control provides optional weather-based irrigation scheduling. Location-specific weather data (ET) is delivered daily to irrigation controllers which allow the realization of quantifiable water savings and reduced operational costs.

#### Standard Watering Application

WaterSense labeled only when this product is used with the Signature Share IRI/Print Package

- Easily operate your controller from your iPhone<sup>®</sup> or iPad<sup>®</sup> from anywhere, web based operation with no complicated manuals.
- Simple programming tools effectively guide through setup and operation.
- Integrates with optional ET download for automatic updating of programs.
- Web based software means always the most current user interface.
- Available in multiple languages soon.

#### Smart Watering Application

WaterSense labeled only when this product is used with the Signature Share IRI/Print Package

- Configure site agronomics to effectively control irrigation.
- Uses state of the art ET tracking data to replenish crop demands.
- Operating in this mode, eliminates the expense and maintenance of remote sensors or weather stations.
- Totally seamless downloading of ET data and together with site data, will only apply the required irrigation needs ... Nothing more..
- No need for expensive computers or software to control irrigation controllers.

#### eAURORA<sup>®</sup> LITE

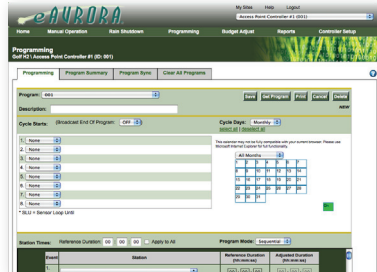

- **eAURORA<sup>®</sup> Lite** is accessible from any internet capable computer anywhere in the world
- Requires no expensive desktop software purchases or support plans
- Eliminates need for dedicated irrigation computer and extended service plans
- Abolishes time consuming software upgrades and related programming

# GOLF CENTRAL CONTROL

## Online Central Control (web based continue)

### eAURORA® PRO

- **eAURORA® Pro** flow manages from anywhere and downloads to your satellite network
- Remotely monitor sites—across the city, state, or world—from one location or an infinite number of locations
- All programs and site data are stored in your personal and secure eAurora® account
- Multi-user environment with multi-level passwords and access controls

## Central Control (PC based)

**AURORA® Professional** software is the classical Personal Computer (PC) based system for irrigation control and water management. It has the capability of Manual Programming, Group Programming

and Flow Managed Programming. It works with local Weather Stations and Environmental Sensors for programming and scheduling.

### AURORA® PROFESSIONAL

- Works with your existing Aurora® network
- Works with hardwire, local radio, or any hybrid version
- Works with traditional valves, decoders, or any combination of the two
- Flow Management: Limits flow within the irrigation system to eliminate the possibility of excessive demand placed on the pumps and piping; Capable of determining the most efficient distribution of water flow within specific limitations set by the operator.

### AURORA® Interface Unit

- The **Aurora® Interface Unit** is the interface between the Aurora® Desktop Software and the Aurora® controllers in the field.
- All controllers are intelligent and smart; meaning, they don't need constant contact with central computers or expensive software packages to operate.
- Not just an interface, but also a controller; can operate standard wired 24VAC solenoids or 2-wire decoders operating 24VAC solenoids.
- Available in several languages.
- Using Signature's patented peer-to-peer technology you can control stations anywhere on you site remotely.
- Perfect for sites that are under construction or the As-Built design is incomplete; program the site via the Interface Unit and once the design is loaded on the desktop, upload all the programs from the field and you are ready.
- Aurora® is easy to operate with flexible configuration and communication options.

#### \* SCS Share Website System Requirements

##### Supported Browsers (JavaScript Enabled):

- Internet Explorer 9+
- Google Chrome 30+
- Mozilla Firefox 24+
- Safari 5+

##### Other Requirements:

- Adobe Flash Player
- Best viewed at 1024 x 768 or higher resolution
