

HOW IT WORKS

SIGNATURE SHARE™ is an internet-based central control system used with SIGNATURE SHARE™ compatible products. It communicates with SIGNATURE SHARE™ irrigation field controllers using cellular connectivity, and allows management of controller from anywhere in the world via the internet.

Along with all the advantages of internet-based access to remote irrigation field controllers, SIGNATURE SHARE™ provides a weather-based irrigation scheduling option. Location-specific weather data (ET) is delivered daily to irrigation controllers which allows the realization of quantifiable water savings and reduced operational costs.

The exciting features of SIGNATURE SHARE™ can be added to all SIGNATURE SHARE™ compatible products, without any changes to the controller other than the addition of a single communications modem board.

(May require a cellular data plan from your local carrier)

Share Website System Requirements

Supported Browsers (JavaScript Enabled):

- Internet Explorer 9+
- Google Chrome 30+
- Mozilla Firefox 24+
- Safari 5+

Other Requirements

- Adobe Flash Player
- Best viewed at 1024 x 768 or higher resolution

FEATURES & BENEFITS

REMOTE ACCESS

- Accessible from any internet capable computer anywhere in the world.
- Remotely monitor sites from one location or an infinite number of locations.
- All programs are stored in the controller once downloaded, and are available 24/7 on our secure server.

COST EFFECTIVE

- Requires no expensive desktop software purchases or support plans.
- Eliminates need for dedicated irrigation computer and extended service plans.
- No time consuming software upgrades and related programming.

EASY TO USE

- No extensive backups; we handle all upgrades, support and maintenance.
- Upgrades are uploaded seamlessly; when you log on they are ready.
- Menus are user friendly and intuitive using graphical user interface.

WEATHER-BASED IRRIGATION SCHEDULING (ET) [OPTIONAL SERVICE]

- SIGNATURE SHARE™ uses real-time weather data (ET) and transmits it to each controller.
- Smart controller functions save water, time and expense.
- Eliminates requirement to purchase a weather station or other weather services.
- The addition of a SIGNATURE SHARE™ communications board makes your existing or new SIGNATURE SHARE™ controller live on the web.
- SIGNATURE SHARE™ accesses any new or existing SIGNATURE SHARE™ compatible products with the addition of a single communications board.

SMART WATERING APPLICATION

- Configure site agronomics to effectively control irrigation.
- Uses state of the art ET tracking data to replenish crop demands.
- By operating in this mode, eliminates the expense and maintenance of remote sensors or weather stations.
- Totally seamless downloading of ER data and together with site data, will only apply the required irrigation needs ... not anything more.
- No need for expensive computers or software to control irrigation controllers.
