Signature
CONTROL SYSTEMS, INC.
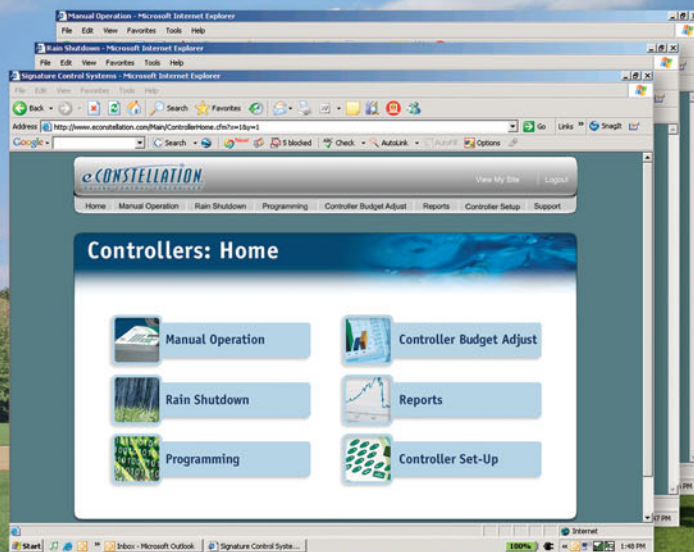

eConstellation® Online Management System

The eConstellation Online Management System is an internet-based network control system for irrigation control and water management. eConstellation works seamlessly with either the Galaxy series or Constellation series satellites. One eConstellation account gives you access to all of your sites. Each site can contain anywhere from 1 to 900 satellites and there is no limit to how many sites or how far apart the sites are from each other. Within each site you need one modem with access to the internet and every satellite at that site becomes available to you through your eConstellation account from any computer in the world that has internet access.

FEATURES AND BENEFITS

REMOTE ACCESS:

- eConstellation is accessible from any internet capable **computer** and/or internet capable **cell phone** anywhere in the world
- All programs and site data are stored in your personal eConstellation account on our secure server and available 24/7
- Remotely monitor sites — across the city, state, or world from any location
- Multi-user environment with multi-level passwords and access controls

COST EFFECTIVE:

- There is no expensive desktop software to purchase or support
- Eliminates the need for a dedicated irrigation computer and extended service plans
- No need for time consuming software upgrades and related programming
- Only one modem per site (site can be 1 to 900 satellites)
- No limit on the number of sites per eConstellation account

EASY TO USE:

- No need for extensive training to use the software and no lengthy manual to read; log onto the web site, enter your user name and password and you are up and running
- Menus are user friendly and intuitive using a graphical user interface
- All program inputs are on one screen
- Control and monitor your networks performance from any internet connection anywhere in the world

ET BASED IRRIGATION SCHEDULING:

- With eConstellation there is no need for an expensive onsite weather station
- Subscribe to the eConstellation weather service and receive a **daily ET download** for every satellite in your network

UPGRADABLE

- You can add eConstellation to your existing Constellation or Galaxy networks, that are running on 5.3 or higher firmware, with the addition of a single eConstellation modem
